* Computer Science has a unique publication structure in that conference proceedings papers are a widely accepted publication venue. Conference proceedings papers are typically subdivided into long papers (4000-8000 words), short papers (2500-4000 words), poster papers, workshop papers, and extended abstracts (varying length). The conference papers are all stringently peer-reviewed, usually by at-least three reviewers and frequently by a meta-reviewer. The 13th IEEE conference had a 46% acceptance rate for submissions.
